

Password freedom simplified

MYPASS PASSWORD MANAGER

MyPass Password Manager from Integralis is a secure, web-based cloud solution that puts password control back in the hands of those that need it most: your users.

WHY SHOULD YOU CHOOSE MYPASS

Increased User Productivity

MyPass delivers access to secure password management without unnecessarily draining helpdesk resources.

Increased Service Delivery

Even with self-service, users will occasionally need helpdesk assistance – when forgetting answers to authentication questions, or attempting remote password reset without registering with MyPass.

Credential Governance & Risk Management

Many organisations struggle to maintain control, visibility and auditing of password reset patterns across multiple systems, users and helpdesks.

Efficiency through security & flexibility

MyPass delivers fast results while improving security and productivity.

WHAT MYPASS CAN DO FOR YOU

User Satisfaction

- Empower shared / mobile users & customers
- Provide 24x7 service with no queues
- Broad access and flexible user preferences

Service Desk Productivity

- Reduce workload through self-service
- Improve service level & user satisfaction
- Reduce password reset cost across all systems

Security & Compliance

- Increase security & governance of passwords
- Introduce new complex password policies
- Users retain sole ownership of their password
